

PROSPERITAS

Name:Corrugated Single Sm...

Size:500x500x400mm

Weight:7kg/pc

Load Capacity:360kg/sqm

Name:Corrugated Single Sm...

Size:500x500x250cm

Weight:6kg/pc

Load Capacity:225kg/sqm

Name:Large Cube

Size:666x666x400mm

Weight:11kg/pc

Load Capacity:350kg/sqm

Name:Double Small Cube

Size:1000x500x400mm

Weight:12.5kg/pc

Load Capacity:360kg/sqm

Name:Single Small Cube

Size:500x500x400mm

Weight:7kg/pc

Load Capacity:360kg/sqm

- 1, Marinas, jetty.
- 2, Jet Ski docks.
- 3, Drive on docks.
- 4, Floating work platforms used in industry, communal projects, and navy engineering, etc.
- 5, Aquatic stages for water shows and activities.
- 6, Pontoon bridges.
- 7, Landing for sailors, rowers, water-skiers, surfers or navy vessels, etc.
- 8, Net cages for aquaculture.
- 9, Swimming Pool, swimming area.
- 10, Floating walkways.
- 11, Bathers' play rafts.
- 12, Bases of outdoor aquatic beer bars, coffee shops, rest shelters, or floral decorative displays, etc.
- 13, Motorized barges (powered by electric motors).
- 14, Floatation anchored raft islands.
- 15, Judge-stages for aquatic sport games.
- 16, Water-boundary markets.
- 17, Enclosures and separators for water treatment plants.
- 18, Aquatic life-guarding platforms.
- 19, Breakwaters.

Remark

Any engineering structure can be designed and installed to meet with the needs and requirements.

- 1.Safety: with patterns on the top surface, Modular Float System is free from the dangers caused by slippery surfaces, splinters and rusty nails usually found on wooden walkways. Also it has no sharp corners and is stable enough to walk on.
2. Versatility: can be used widely in various fields.
3. Economy: free maintenance and low upkeep.
4. Convenience/Simplicity of Construction: can be easily quickly installed and dismantled.
5. Color: Light/Dark Blue, Beige, Black, Grey, Red, Yellow, Purple and Orange, etc
6. Durability: resistant to UV rays, frost, seawater, corrosion, chemicals, and oil.
7. Changeability /Resolvability: one connecting pin holds four modules together-permitting the assembly of any size and any configuration on the water and the assembly can be changed to meet the requirements.
8. Recycle: HDPE Material, 100% recyclable, environmentally friendly.
9. Strength: Screw each float's tensile strength is over 1950kg approved by the official authorities, test speed is 50mm/min. (This is the MOST important item to the quality because the connecting is the foremost factor to the floating dock.)
